

AirWave®

MADE FROM 80% RENEWABLE RESOURCES

PaperWave® PRISMA

ClimatePartner
certified product
climate-id.com/4NH24N

In line with the motto: "Sustainability doesn't have to be ugly", we offer the PaperWave® PRISMA fiber-based air cushions, which are available in over 60 colors. PRISMA allows modern fashion, cosmetics and luxury manufacturers to make a particularly sustainable impression in addition to an attractive unpacking value.

PaperWave PRISMA type 7 for void filling and type 8 for wrapping

PaperWave® comes with a ultra-thin sealing layer of compostable bio-film, which has no negative impact on recyclability in the repulping process. The product is marked with the RESY symbol and the sorting aid symbol according to DIN 6120 (PAP22). This makes it very easy for the consumer to correctly assign the material to the recycling containers. The material also degrades in the environment in just a few months.
