

AirWave®

HIGHEST PRECISION NEEDS THE BEST PROTECTION

The AirWave ESD Series

With the high-performance ESD air cushion series, the AirWave Packaging development team presents a new generation of ESD films in the thinnest and most cost efficient version, while not compromising ESD values at any time. With $10^9 \Omega$ this ESD film offers the best protection for shipping.

www.airwavepackaging.com

AirWave ESD films independent of film thickness – from 0.8 to 0.5 mil

AirWave Packaging breaks new ground with the antistatic air cushions. Until now, ESD properties under $10^9 \Omega$ were only possible based on heavy films with higher volume and a high antistatic masterbatch dosing.

With the LQC-Nano technology of AirWave Packaging, a long lasting and humidity independent ESD protection is now achieved. Today we can offer the best, cheapest and resource-efficient ESD protection, we ever produced.

- Film rolls from 2,300 to 6,560 ft
- Film gauge 0.8 to 0.5 mil
- Weight load from 12 to 34 lb
- Filler and wrapper
- 8.2 - 33 inch wide
- 12 different patterns
- Amine-free and non corrosive
- Works great with AirWave1, AirWave2, AirWavePRO or nano4

Use as direct wrapper or as void fill
